SUMMARY

Strong expertise in **Python**, **SQL**, and **problem solving**, with hands-on experience in building a **movie recommendation** and analytics platform using **Streamlit**. Skilled in analyzing user behavior and deriving data-driven insights using **NumPy** and **Pandas**. Seeking an opportunity to apply analytical thinking and develop scalable, data-driven solutions.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java (Core), C++
- **Technical Skills:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Random Forest, Streamlit, Git, MySQL, Power BI, Jupyter Notebook, Advanced Excel, Microsoft Office, Generative AI, LangChain, API Integration
- **Certifications:** SQL Certification – HackerRank, Python Certification – HackerRank

PROJECT

Movie Recommendation System

- Built a Python & Streamlit movie recommendation app with **search**, **filtering**, and **personalized suggestions**
- Implemented a content-based recommendation system using user preferences and **similarity techniques**
- Analyzed watch history and search patterns to generate user engagement insights
- Integrating an **API-based chatbot** with **MySQL** for interactive, **data-driven** user support

Rainfall Prediction System

- Predicted rainfall using historical weather data with **Random Forest**, handling class imbalance and tuning hyperparameters with **GridSearchCV**.
- Performed data preprocessing, **feature analysis**, and **visualization** with **Pandas**, **NumPy**, **Matplotlib**, and **Seaborn**.

Blinkit Sales Dashboard Using Power BI

- Developed an interactive Power BI dashboard analyzing Blinkit sales across **8,000+ transactions**, covering outlet performance, product segmentation, and customer preferences.
- Extracted insights on sales trends, outlet size contribution, and product visibility across **15+ product** categories using advanced **DAX measures** and dynamic visuals.
